

To Whom It May Concern:

Re: Recommendation Letter for Alex Veley

Date: September 18, 2025

In the position of Network Response Associate, Alex Veley was an outstanding employee and a highly competent, proven self-starter. Along with the day-to-day challenges of working on multiple complex technical projects, he was able to dive into his role quickly. Alex did an excellent job and was an asset to AccuCode during his tenure. He is organized, understands requirements for process improvement, quality control, workflows, taking on multiple projects simultaneously, ensuring that all projects and network installations are completed in a timely manner.

Alex has the drive that will make him an asset to any organization. He can work independently or with a team; he can easily help to identify production issues on the line and is a quick study to pick up on new or change processes. He is always willing to offer his assistance to anyone and has an excellent rapport with the team.

I am confident that Alex will devote and dedicate himself to a position with a high degree of diligence as he did with AccuCode. Alex's departure was only due to the end of a project contract and he will be sorely missed on our team. I would recommend Alex Veley without reservation for any endeavor he chooses to pursue in the future.

Sincerely,

A handwritten signature in black ink that reads "Kevin Price".
